-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Specification***

The disclosure is objected to because of the following:

The term "boss" is not the proper term to depict element 10 and goes against the typical definition of "boss". It does not appear that elements 3 and 3' define respective bosses.

Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "boss" is not properly used in this context, as discussed above.

In claim 8, "said retention plate may be inserted through said apertures" is indefinite.

In claim 9, "the dimensions of said hollow interior of said hollow elongated body portion" is not understood.

The limitation that the retention plate is "limited" or "not limited" is vague and indefinite.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3634

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Paule.

See bosses defined by 23,25,26, and 24,27,28. The interior and exterior upper, lower, first and second surfaces are broadly recited and are met by any of the surfaces in the slat crosssection of Fig. 1. The term "generally" is broad and easily met.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Zabala.

See the bosses that define openings 26,28, each of which have C-shaped portions as well as being near junctions of upper and first, etc., surfaces. See screws 30,32.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlater et al in view of either Zabala or Quasius.

Schlater et al discloses a slat that has a retention plate 50 and two screws 62, extending therethrough for attachment to the slate. Providing receiving apertures

Art Unit: 3634

(bosses) for the screws is taught by both Zabala, discussed above, and Quasius at 30. Such apertures provide an exact and secure attachment of the retention plate. It would have been obvious, in view of these teachings, to provide Schlater et al with such apertures. The recitation regarding the "not limited" size and shape is met as best understood.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
